### Exploring Presentation Applications

#### *Student Information for Completing this Project:*

As you follow along with the tutorial movies for the example project, you will complete a presentation that consists of 10 slides. The first slide contains images that act as buttons to link to other slides in your presentation. All of the images that you will need for the example project will be in your 'Hand-Out' folder. The text and other information that you will need for each slide are given below.

Once you have completed the example project, you may want to create a presentation about your own family. You can begin by gathering the same type of information that we've used in the sample project for your family members; each person's birth date, birthplace, relationship to you, and an historical event. You may want to include other interesting facts about each person, such as what they did for a living or where they grew up. What do you think others would like to know about the people who are in your family?

You may use the graphic images from this example project for your own presentation, or you may want to use actual pictures of your family members.

Depending on how many family members you include in your presentation, you may end up with more or less slides than our example project.
