One thing that makes me unique is I was born in February 29—LEAP Day!

My best memory from elementary school is doing science projects in Mr. Henshaw's class.

One thing I know about history is Jamestown was the first permanent English settlement in the United States of America.

This summer I taught summer school, took a history class and field trip to Gettysburg, and went to the beach.

When I'm not in school you'll probably find me reading, walking, Curves or watching NCIS.

My favorite team is Virginia Tech....Go HOKIES!

The best field trip I ever went on was when I went to Monticello and Gettysburg.

I live in the town of Pulaski with my husband and 2 daughters. Meghan is 19 and attends Radford University. Maci is 16 and goes to PCHS. We have 3 dogs and one cat.

Something I want you to know about me is I think every person is UNIQUE & VALUABLE! I want you to know that I will be here to help you get your work completed...you're not on your own in my class!

My favorite book is hard to name. I've read SO many GREAT books. This summer I read Red Thunder and Woods Runner. I loved them both. The Chronicles of Narnia books are some of my favorites.

I hope learning about United States History this year will be FUN!
