

In kindergarten, a great deal of time is spent teaching the children how to hold a pencil correctly for printing activities.

Many parents have asked us to show the correct form so that they may also help by insisting on good pencil habits at home.

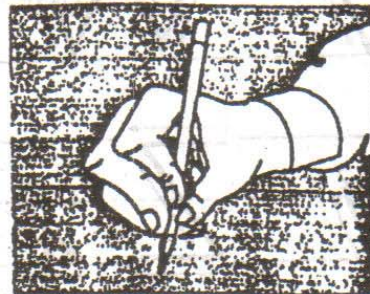

Please be sure that your child holds the pencil with the thumb and index finger gently pinching the pencil on "top". The pencil should rest on the middle finger. The middle and all the remaining fingers are "underneath" the pencil.

Pencil grips can be purchased at school supply stores and can be helpful for some children.

Thank you!
